Video

hier kommt sämtlicher Code zu meinem Smartphone Dashboard incl. der dazugehörenden Videos

<https://www.youtube.com/embed/fotqUsq0sVg>

Back Button

type: custom:mushroom-chips-card

chips:

- type: template

icon: mdi:arrow-left

tap_action:

action: navigate

navigation_path: /smartphone-1/0

Grundgedanke

macht euch im Vorfeld Gedanken was ihr alles braucht

image not found or type unknown

Welche Räume und Status Seiten brauche ich?

PV

Image not found or type unknown

```
type: custom:mini-graph-card
entities:
  - sensor.pv_anlage_electrical_measurement
color_thresholds:
  - value: 0
    color: '#ff0000'
  - value: 50
    color: '#ff8800'
  - value: 200
    color: '#90ee90'
align_icon: left
align_state: center
show_points: false
height: 100
hours_to_show: 24
name: Produktion
show:
  graph: true
  name: true
  extrema: true
```

Image not found or type unknown

```
type: energy-solar-graph
```

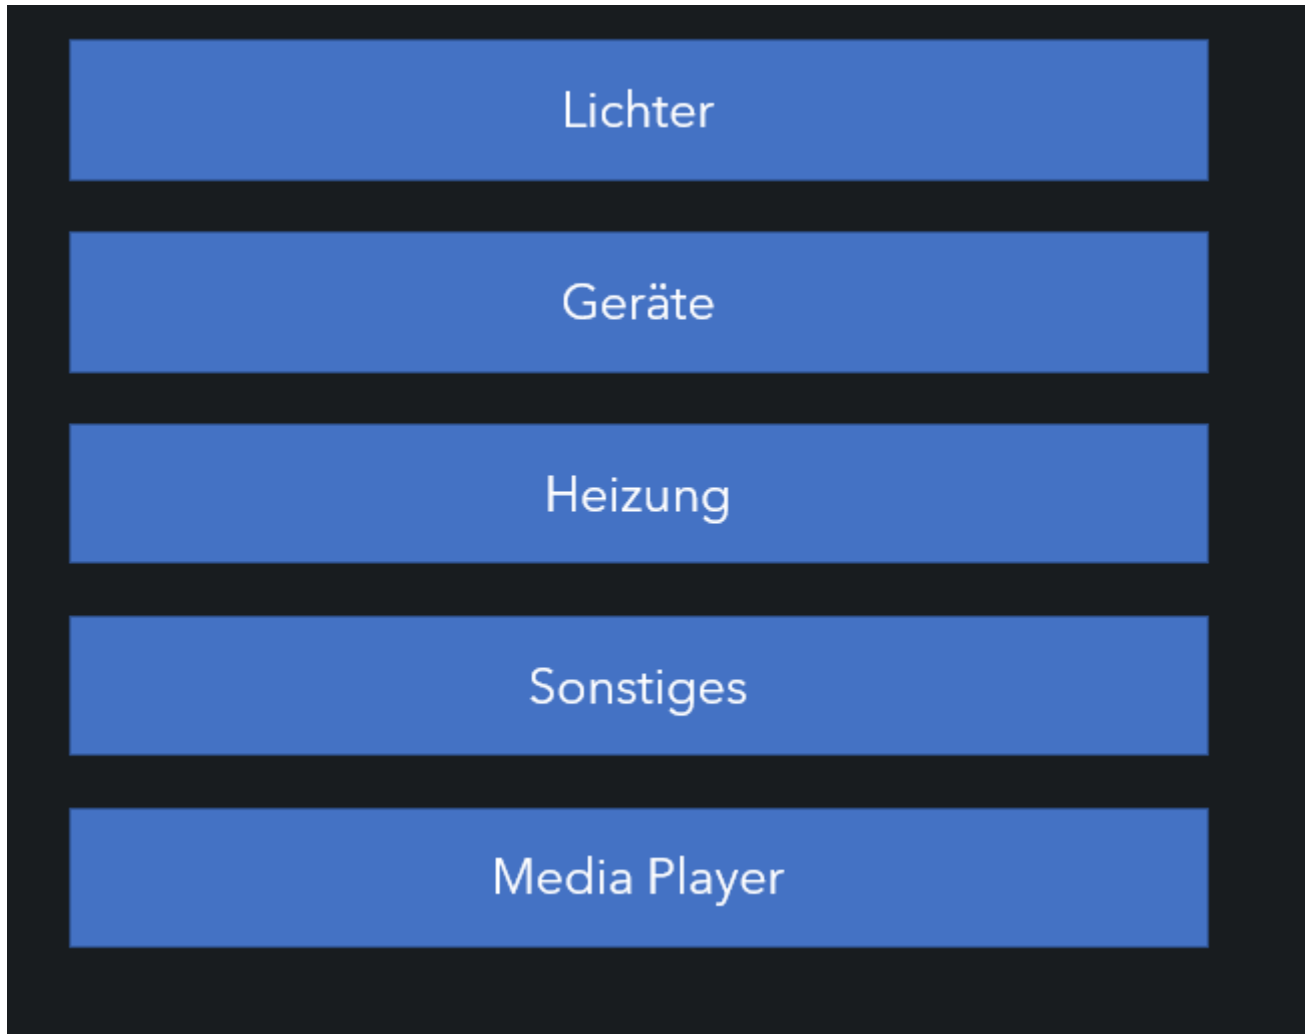

Image not found or type unknown

type: custom:sun-card

Raumstruktur

überlege dir eine Struktur wie du deine Kategorien anlegen willst

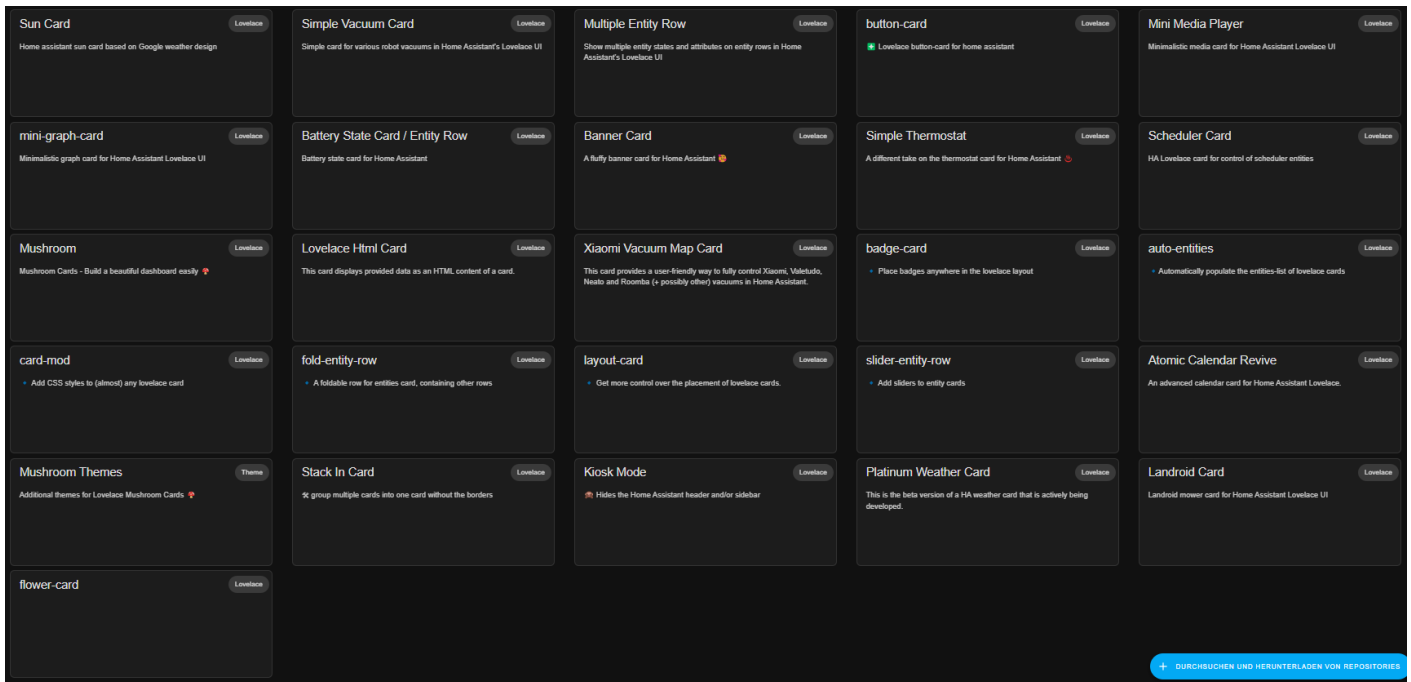

Kioskmode

Erstellt einen Helfer-Schalter mit dem Namen Kioskmode

Danach können wir den Kioskmode aktivieren indem wir folgenden Code im Dashboard ergänzen

```
kiosk_mode:  
  entity_settings:  
    - entity:  
        input_boolean.kioskmode: 'on'  
        hide_sidebar: true  
        hide_header: true  
    - entity:  
        input_boolean.kioskmode: 'off'  
        hide_sidebar: false  
        hide_header: false
```

Meine Frontend Pakete aus Hacs

wenn ihr mein Dashboard nachbauen wollt solltet ihr alle diese

Seiten anlegen und einstellen

Jetzt geht es an die Grundstruktur des ersten Raumes hier habe ich meist folgende Config:

```
type: vertical-stack
cards:
  - type: custom:mushroom-chips-card
    chips:
      - type: template
        icon: mdi:arrow-left-bold
        picture: ""
        content: Home
        tap_action:
          action: navigate
          navigation_path: /lovelace-yotube/smartphonehome
      - type: entity
        entity: sensor.TEMPERATUR
      - type: entity
        entity: sensor.LUFTFEUCHTIGKEIT
    - type: custom:mushroom-template-card
      primary: Lichter
      secondary: ""
      icon: ""
    - type: vertical-stack
      cards: []
    - type: custom:mushroom-template-card
      primary: Geräte
      secondary: ""
      icon: ""
    - type: vertical-stack
      cards: []
    - type: custom:mushroom-template-card
      primary: Heizung
      secondary: ""
      icon: ""
    - type: vertical-stack
      cards: []
    - type: custom:mushroom-template-card
```

primary: Sonstiges

secondary: "

icon: "

- type: vertical-stack

cards: []
