

# Switchbot Smartlock Pro

Hier alle Infos die ich im Video erwähnt habe:

<https://www.youtube.com/embed/eua2uQ6Fsk4>

## **Addon Repo:**

<https://github.com/hsakoh/ha-addon>

## **Amazon Link:**

<https://amzn.to/3XPVokn>

## **Lock Config für configuration.yaml:**

```
lock:
  - platform: template
    name: Garagen Tür
    value_template: "{{ is_state('binary_sensor.both_lockstate_xxxxxxxx', 'off') }}"
    lock:
      action: button.press
      target:
        entity_id: button.btn_1_cmd_xxxxxxxx
    unlock:
      action: button.press
      target:
        entity_id: button.btn_2_cmd_xxxxxxxx
```

Hier musst du nur deinen Sensor austauschen sowie die Buttons
